

Dear Colleagues,

The 2018 Vaccines for Children (VFC) provider enrollment is available as of Friday April 13, 2018 in IV4. The Centers for Disease Control and Prevention (CDC) and the Kansas Immunization Program require all VFC providers to re-enroll annually to continue participation in the VFC program.

Please see the [“2018 VFC Provider Enrollment Instructions on IV4”](#) on our website.

If you are a direct entry provider for KSWebIZ, please see the [“Eligibility Category Patient Count Report and Your 2018 VFC Enrollment”](#) on our website for further guidance to assist with your profile.

If you are a birthing hospital that only administers Hepatitis B vaccine through the VFC program, please note that you only need to list your primary medical director prescribing the birth dose of vaccine in your provider list.

**Please complete the online enrollment by May 11, 2018.** Timely completion and submission of your enrollment will assure your clinic receives uninterrupted vaccine delivery.

We appreciate the stewardship each provider continues to demonstrate in assuring that VFC vaccines are managed appropriately so each child is immunized with viable, effective vaccine. Your hard work and commitment to keeping children healthy and free of vaccine preventable disease is admirable.

If you have any questions related to the enrollment process, please contact your [Regional Immunization Consultant](#).

Thank you,

Phil Griffin
